Anything else is a compromise

NOTHING  
ESCAPES  
EXCEPT PURE  
AIR

*Since 1899*

At Miele, we believe there should be more to vacuum cleaners than just how they clean the surfaces within your home. With dust being one of the leading causes of respiratory problems and allergies, a vacuum cleaner should be an integral part of a holistic approach to caring for your family's wellbeing.

It is for this reason that Miele engineers have designed vacuum cleaners that lead the way in the purity of the air they emit, as well as in their cleaning ability. Capturing 99.9% of all particles in addition to providing optimum cleaning performance, our vacuum cleaners represent a new generation in domestic hygiene care. And at the forefront of this innovation is the new S6 series. With ingenious features and compact design, the S6 series expertly meets all your demands for creating a healthy home.

## More than a century of quality

Since our inception in 1899, Miele has been recognised as a leader in both technological innovation and quality.

In the last 10 years alone, Miele has participated in more than 60 vacuum cleaner consumer tests in 12 countries worldwide, of which we have been awarded 1st place in 40 tests.

In 2011, Miele received the highly coveted Best Brand award for the fifth year in a row, in recognition of its extraordinary brand strength from the GfK Group – Germany’s leading market research company. And, for the tenth year in a row, Miele was also named one of Europe’s Most Trusted Brands by Reader’s Digest Europe in its annual Trusted Brands consumer survey.

## Stringent testing ensures the highest levels of quality

With more than 80 years of experience in floor care technology, all our vacuum cleaners exceed industry standard requirements, and are rigorously tested to last up to 20 years\*.

							
Automatic cable rewind test Miele: 10,000 times StiWa: 6,000 times	Motor endurance test Miele: 1,000 hours StiWa: 600 hours	Threshold test Miele: 30,000 times StiWa: 10,000 times	Plug flexing test Miele: 150,000 times StiWa: 50,000 times	Floor head endurance test 1,000km on tiles 1,000km on carpets	Climatic test All materials must be able to withstand high temperature	Weight loading test Only Miele: 5kg weight x 120,000 times	Final assembly test All vacuum cleaners are fully tested before leaving the assembly line

\*Stiftung Warentest, independent consumer watchdog body in Germany. Based on average usage of 45 minutes per week at maximum output.

## Unique 12-step AirClean filtration system

Only Miele vacuum cleaners incorporate a 12-step AirClean filtration system. Dust and allergens are hygienically removed and pure air is expelled back into the room, creating a clean, allergy-free environment. Miele vacuum cleaners offer unparalleled dust retention.

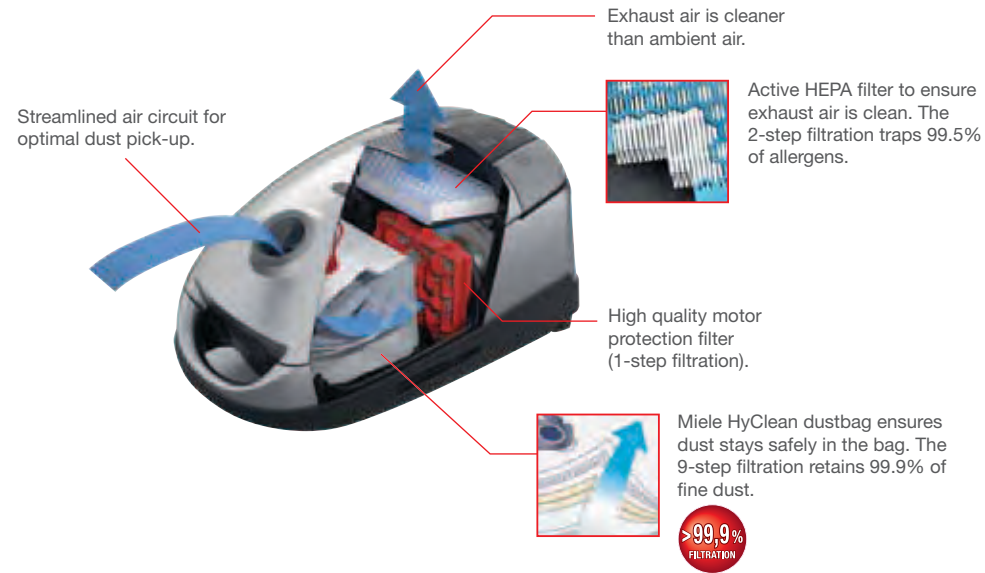

Germany's  
air-hygiene institute

Independent  
German product  
testing organisation

German Allergy  
and Asthma Association

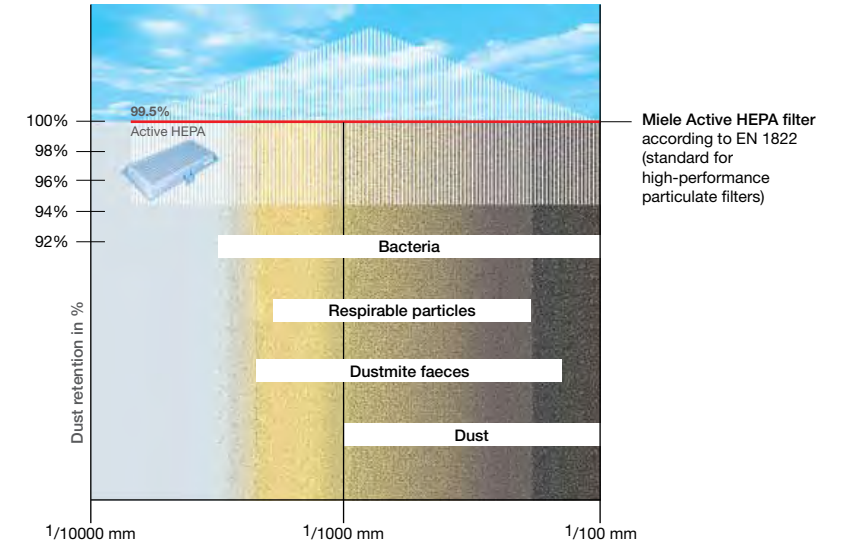

## Capturing particles too small to see or feel

The Miele Active HEPA filter successfully captures even the most minute particles of dust, making it ideal for allergy sufferers.

When fitted with the Miele Active HEPA filter, all our vacuum cleaners are entirely dust tight and HEPA 12 certified from Germany's DMT air-hygiene testing laboratory.

Dust retention performance of the Miele Active HEPA filter

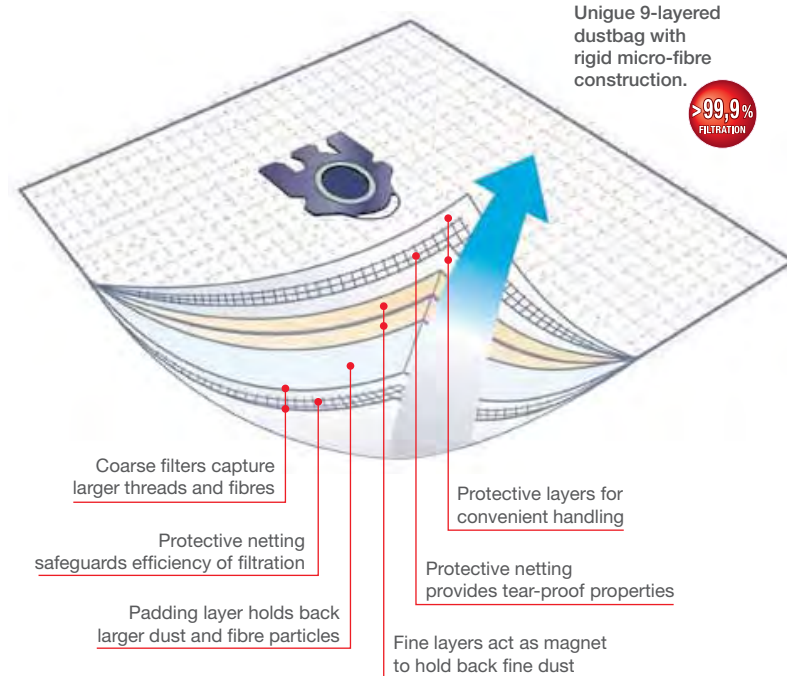

## Steps 1-9: HyClean Dustbag Setting a new standard in filtration, hygiene and safety

Tear-proof materials, superior material retention and longer bag life, all amount to the world's best vacuum cleaner dustbag.

One gram of carpet dust contains around 730 million bacteria<sup>1</sup>. A full dustbag contains approximately 400 grams of dust<sup>2</sup>. Four dustbags each year collect around 23 billion bacteria over 20 years. If lined up, these bacteria would form a chain spanning the circumference of the earth<sup>3</sup>. Placed in this context, it is easy to see the importance of 99.9% retention of dirt and fine dust by the HyClean dustbag.

<sup>1</sup> According to Allergopharma  
<sup>2</sup> According to European test institutes  
<sup>3</sup> Approximate circumference of the earth: 40,000km

## Step 10: Motor Protection Filter Cleanliness that goes on and on...

Precision German engineering ensures our motors are made to last.

A separate air filter works to keep the motor dust free, so your Miele vacuum cleaner motor will be working just as well, for up to 20 years.

### S6 Motor Options

					
<b>POWER 2000 W</b> High-performance motor for customers keen on high wattages.		<b>Efficiency 1200 W</b> Energy-saving motor for energy-conscious consumers.		<b>Silence 1200 W</b> Special sound-proofed and energy-saving motor* for customers seeking a serene home environment. *71 dB(A) re 1pW in combination with AirTeQ floor head.	

## Steps 11-12: Air Filter

### Ultimate protection against dust and allergens

Miele vacuum cleaners' optimised air discharge filters have the hygiene seal of approval from Germany's TÜV laboratories. They are proven to substantially reduce the levels of pollutants in ambient room air, and feature unparalleled durability with high performance ratings.

When paired with the Active HEPA double-layered exhaust filter, which itself exceeds the highest European Standards (EN 1822), they form two components of the 12-step AirClean filtration system.

Together with the HyClean dustbag and motor protection filter, this creates a powerful barrier that effectively traps 99.5% of allergens.

AirClean filter  
Effective filter for regular use.

Active AirClean filter  
Incorporates a layer of active charcoal, which neutralises all unpleasant odours. Ideal for pet owners.

Active HEPA filter  
Filters the smallest of particles, guaranteeing maximum air hygiene. Contains active charcoal to remove all unpleasant odours. Highly recommended for allergy sufferers.

Introducing the stunning new S6 series

## Innovative, compact design

Not only do the S6 series vacuum cleaners function beautifully, their small size and light weight make them simple to both operate and store.

Light-weight spaceframe design weighs only 4.5kg.

Robust casing can withstand weight up to 100kg, making it safe and durable.

The compact system takes up minimal space during storage and allows easy transportation for both left-handed and right-handed users.

## Manoeuvre easily around a large area

The thoughtful design of the S6 series offers you easy access to every space within your home.

Large operating radius of 10m for easy vacuuming of large spaces.

360° castor wheels on steel axels for maximum manoeuvrability.

Rubberised wheels are gentle on hard flooring.

The automatic-rewind cable is retracted with a single touch.

# Legacy of the Miele vacuum cleaner

For over a century, Miele's research, development and quality control laboratories have looked into new innovations and engineering methods to improve on current technology.

Miele vacuum cleaner technology had seen tremendous breakthroughs to effectively pick up and, most importantly, retain dust and other indoor air pollutants.

Every aspect of a Miele vacuum cleaner is designed with a holistic approach in mind, encompassing users' health and convenience to functionality and efficiency.

Meeting your every demand  
in creating a healthy home.
